

Valter Nunez

Founding / Full-stack Engineer

valter.nunez@outlook.com | linkedin.com/in/valternunez | valternunez.github.io

Summary

Engineer who ships whole products: backend, frontend, payments, infrastructure. Solo-architected **Nexus**, a multi-tenant SaaS with a double-entry finance engine and Stripe Connect, built with an orchestrated multi-agent dev workflow (AI coding agents + git worktrees). Co-founded a software studio. Five years on high-traffic e-commerce building event-driven systems with measured impact (decoupled 83% of sales flows from the ERP; cut shipping spend ~78%). Now studying **MSc Data Science, LSE** in London (UK Graduate visa, 18 months, no sponsorship required); seeking Skilled Worker sponsorship to stay long-term.

Selected Projects

- **Nexus (solo)** — multi-tenant SaaS for property administration, architected and built end to end: double-entry **finance engine** (ledgers, billing, payouts), **Stripe Connect** (charges, SPEI, disputes, reconciliation), per-tenant RBAC, async pipeline (Celery/RabbitMQ), an LLM assist (Gemini) with metering & structured output, and a Next.js 16 PWA frontend. Shipped solo via an orchestrated multi-agent dev workflow (specialist implement/review/audit agents, git worktrees).
- **Ballon d'Or attention study** — Bayesian decomposition (PyMC) shipped as a D3 scrollytelling site + Quarto report, an end-to-end data product.
- **World Cup 2026 momentum** — live natural-experiment pipeline (local scrape → GitHub Actions → Pages) that regenerates daily.

Experience

Backend Engineer

ZeBrands — high-traffic e-commerce

Sep 2021 – Mar 2026

Remote, Mexico

- Designed and built **OZ**, an event-driven resilience platform (FastAPI, PostgreSQL, RabbitMQ, Redis), decoupling 83% of revenue-critical sales flows from the ERP; projected a 91% reduction in sales-blocking downtime; now live across ~195 stores (Mexico, expanding to Brazil), sustaining ~MX\$102M over the nine-day Hot Sale peak.
- Built multi-carrier shipping middleware with automated least-cost routing (~78% lower shipping spend); maintained existing client-facing microservices, GraphQL APIs, and Grafana observability; mentored a junior developer.

Co-Founder & Developer

Laiter — software studio

2017 – 2019

Mexico

- Co-founded the studio; built client web applications end to end (Django, JavaScript) and the early usage-analytics dashboards customers ran decisions on; owned deployments and production support.

Education

MSc Data Science

London School of Economics (LSE)

2026 – 2027

In progress, London

B.S. Computer Science & Technology

Tecnológico de Monterrey (ITESM)

2016 – 2021

Avg 90/100

Semester abroad at RMIT University, Melbourne (Avg 94/100). IBM Data Science Professional Certificate (in progress).

Technical Skills

Backend: Python, FastAPI, Django, GraphQL, Celery, PostgreSQL, Redis, RabbitMQ

Frontend: TypeScript, React, Next.js, JavaScript

Payments & Infra: Stripe Connect, Docker, GitHub Actions, Grafana, S3

AI / LLM: LLM integration (Gemini), structured output; agent-orchestrated development (Claude Code, git worktrees)

Data Science: pandas, NumPy, scikit-learn, PyMC

Languages spoken: Spanish (Native), English (C2), German (A2), Italian (A1)
